Miles O'Brien

Transporter Chief & Chief Operations Officer

Summary

Highly experienced Starfleet tactical and operations engineer with over 15 years of service. Expert in transporter systems operations, Cardassian phase-converters, sub-space field stabilization, and general warp core maintenance. Known for maintaining operational efficiency under extreme combat and anomaly conditions.

Experience

Chief Operations Officer - Deep Space Nine (2369 - 2375)
Managed all station operational subsystems, rebuilt Cardassian hardware interfaces to integrate with Federation standard technology, and coordinated docking protocols for Bajoran sector fleets.

Transporter Chief - U.S.S. Enterprise NCC-1701-D (2364 - 2369)
Responsible for primary and auxiliary transporter system operations. Performed complex bio-filter calibrations and handled emergency pattern buffer diagnostics during hostile encounters.

Skills

Transporter Operations, Deflector Shield Modification, Subspace Field Mechanics, Cardassian System Integration, Replicator Re-programming, Phaser Calibration, Stress Management under fire.
